

C 1 bacteria, or intracellular infectious parasites].

C 2  
10. (Twice Amended) A [The] nucleotide sequence [according to claim 1,]  
comprising the nucleotide sequence of an oncoselective autonomous parvovirus, and at least  
one effector nucleotide sequence encoding an effector polypeptide which effects the  
destruction or the normalization of cancer cells,

wherein the effector nucleotide sequence comprises at least one sequence chosen from  
the group consisting of the nucleotide sequences that encode:

- a cytotoxic polypeptide or at least one fragment of this polypeptide,
- a molecule which confers on the transfected cell sensitivity to a radioactive toxic agent,
- at least one polypeptide which increases an immune response, and
- at least one polypeptide or a fragment of this polypeptide [capable of inhibiting]  
which inhibits tumor neoangiogenesis.

Claim 26, line 1, delete "or";  
line 2, delete "infection by virus, bacteria or intracellular"; and  
line 3, delete "infectious parasites".

Claim 27, line 1, delete "or";  
line 2, delete "infection by virus, bacteria or intracellular"; and
